

Help Your Community Prepare for Wildfire!

Workshop Series: Building Community Capacity for Wildfire Preparedness

Build local leadership. Reduce wildfire risk. Plan for resilience.

The purpose of this workshop is to help community groups build the knowledge, skills, and relationships needed to develop a Community Wildfire Protection Plan (CWPP) and take collective action to reduce wildfire risk.

What is a CWPP? A Community Wildfire Protection Plan (CWPP) is a locally developed plan that identifies wildfire risks and outlines community-specific actions to reduce those risks. It helps communities prioritize mitigation projects, strengthen preparedness, and access funding.

Who is this workshop for? This free workshop is for teams of 2–5 people from the same community—such as HOA board members, neighborhood leaders, or community wildfire preparedness groups. No technical background required—just a willingness to work with neighbors and lead your community toward wildfire preparedness.

What you'll gain:

- A better understanding of wildfire risk in your area
- Step-by-step guidance to create your CWPP
- Skills in community engagement, facilitation, and planning
- Connections to funding, local agencies, and wildfire experts
- A stronger, more organized community network

Even if a full CWPP isn't completed, your team will leave with:

- A roadmap for action
- New partnerships
- Increased confidence and capacity for wildfire preparedness

Seats are limited—priority given to community groups of 2-5 people that can commit to attending.

Workshop format: 5 in-person sessions (3 hours each), every other week

In-person sessions will take place during the weeks of April 6th, April 20th, May 4th, May 18th, and June 1st

Self-paced online lessons in between sessions

Homework assignments to apply learning in your own community
